Unit 3	<b>GST:</b> 1) Introduction, Important Terms 2) Structure and Classification of GST 3) Concept and Impact of Tax Credit 4) Meaning, scope, place and time of supply 5) Computation of assessable value under Gst

## Concept of Business

“Business” simply means any economic activity carried on for earning profits. In other words “any trade, commerce, manufacturing activity or any adventure or concern in the nature of trade, commerce and manufacture”.

It is the regular occupation of a person in which they engage in an activity to earn the profit and acquire wealth. It can be a for-profit entity, like publicly owned or privately owned company or not-for-profit entity. There are mainly five forms of business organization which are Sole Proprietorship, Partnership, Cooperative Societies, Joint Hindu family business, and Joint Stock Company.

### The main characteristics of business are:

- An economic activity
- Production or purchase and sale of goods and services on a regular basis.
- The main purpose is to earn profit
- Uncertainty of return
- Presence of element of risk

## Concept of Profession

The profession is defined as a paid occupation in which a person is formally qualified and has undergone prolonged training, render services to general public. It refers to any activity that requires expertise in specialized knowledge and skills acquired by way of formal learning and practical experience, to be applied by the individual in their respective occupation. Some common examples of the profession are Doctors, Lawyers, Chartered Accountants, Engineers, Architects, etc.

To be called as a professional, a person should be a registered member of a profession. In every profession, there are certain rules called as the professional code of ethics; that governs it. The purpose of a profession is to provide services to those who need it, for a direct and certain compensation called fee.

## Types of Accounts:

The different types of accounts are as follows:-

- Personal Account
  - Personal Representative Account
  - Personal Artificial Account
  - Personal Natural Account

- Real Account
  - Real Intangible Account
  - Real Tangible Account
- Nominal Account

### **Personal Accounts:**

As stated earlier, personal accounts are those accounts that are related to an individual, a company, a firm or a group of associations etc. These persons might incorporate natural persons, artificial persons or representative persons, as the case may be.

For example–Manoj and Saroj trading Co, Charitable trusts, ABC Bank Ltd ,X company Ltd, etc.

There are some accounts that might come under the category of personal representative account.

For instance – When we speak of salary, it means how much amount is payable to each of the employees. But all salary accounts are clubbed collectively under an account called 'salary payable A/c'.

Rule for this Account

- The receiver is debited
- The Giver is credited.
- Type of Personal Accounts
  - a. Natural Persons
  - These types of accounts are related to individuals or natural persons like Ranveer's A/c, Aryan's A/c, Ritwik's A/c etc.
  - b. Artificial Accounts
  - These accounts are related to various companies and institutions like Roy Brothers Pvt Ltd A/c, Lion's Club A/c, etc. Thus, such types of institutions and companies are those entities that are there in the eyes of law.
  - c. Representative Accounts
  - Accounts that represent a specific purpose of work are called representative accounts. For instance, Outstanding Wages A/c, Outstanding Interest A/c, Prepaid Expense A/c, etc.

### **Real Account:**

Real Accounts are those accounts that relate to assets, properties or possessions. These related properties might exist in physical or non-physical form.

Golden Rule relating to this type of personal account:

- What comes in is to be debited
- What goes out is to be credited

### **Nominal Account:**

Nominal accounts are those types of accounts that are related to any form of income or expenditure, gain or loss. For example Rent A/c, Salary A/c, Wages A/c, etc.

Golden rule for such accounts:

- All types of expenditure and losses relating to the business are to be debited.
- All forms of income of business and gains, if any are to be credited.

## **Journal**

### **Meaning of journal**

Journal is a chronological record of financial transactions of a business.” o It is book of prime entry or original entry in which all the business transactions are recorded the first in the sequence in which the transactions had actually occurred.

### **Characteristics:**

- o It is a chronological record of financial transactions of a business.
- o It is a book of original entry which records all the details of transactions from various source documents.

It records both the aspects of a transaction i.e., debit and credit using Double Entry System of Book Keeping.

It gives complete details of a transaction in one entry.

It form the base for recording or transferring the journalized transactions to the individual accounts known as ledger accounts.

It is known as books of original entry.

### **Types of Journal Entries:**

#### **o Simple Journal Entry:**

It is the type of entry in which only two accounts are affected where one account is debited and another account is credited with an equal amount.

#### **Compound journal entry:**

It is the type of entry in which more than two accounts are affected i.e. one or more accounts are debited and or one or more accounts are credited or vice versa.

## **Ledger**

All the accounts recognized on the basis of transactions recorded in different journals will be opened and maintained in a separate book called Ledger.

So a ledger is a book of account; in which all types of accounts relating to assets, liabilities, capital, expenses and revenues are maintained. It is a complete set of accounts of a business enterprise.

Ledger is in a book with pages consecutively numbered. It can also be a bundle of sheets.

All the items from the journal are recorded in ledger accounts and this process is known as posting entries from Journal to ledger accounts.

## **Features of Ledger Account**

1. Ledger book is an accounts book to which various transactions of an enterprise are posted under different accounts.
2. It follows the double-entry system.
3. It is also known as the Principal book of account as it is the book of final entry of transactions after the journal or all-purpose books.
4. In the ledger, all the types of accounts relating to assets, liabilities, capital and revenue are maintained.
5. It is the only record of the business transaction classified into relevant accounts.
6. It facilitates the preparation of financial statements in future.

## **Trial Balance**

Trial balance is a statement prepared with the debit and credit balances of ledger accounts to test the arithmetical accuracy of the books.

### **1. Objectives, Needs or Functions of Preparing a Trial Balance**

2. Ascertain the arithmetical accuracy of the ledger accounts
3. Helps in locating errors
4. Summary of the ledger accounts

5. Helps in the preparation of final accounts

### **Balance Method of Preparing Trial Balance**

Balance method is the most commonly used method of preparing trial balance as it facilitates the preparation of final accounts. Under this method, trial balance is prepared by showing the balances of all ledger accounts (including cash and bank accounts) and then totaling up the debit and credit column of the trial balance to assure their correctness. The account balances are used because the balance summarizes the net effect of all transactions relating to an account and helps in preparing the financial statements. Trial balance can be prepared under this method, only when all the ledger accounts have been balanced.

## **Goods and Services Tax: An Introduction concept. Basic Elements, Need and Impacts**

### **MEANING OF GOODS AND SERVICES TAX (GST)**

GST is a destination based tax on consumption of goods and services. It is proposed to be levied at all stages right from manufacture up to final consumption with credit of taxes paid at previous stages available as set off. In a nutshell, only value addition will be taxed and burden of tax is to be borne by the final consumer.

The tax would accrue to the taxing authority which has jurisdiction over the place of consumption which is also termed as place of supply.

Though GST is multi point tax but it is not levied on total value in every stage. It is levied on only value addition by the supplier. In input credit method the total GST payable on supply Less Input credit shall be net GST payable.

### **SALIENT FEATURES OF GST SYSTEM**

GST is the latest concept in respect of taxation on supply of goods and services in course of business, commerce and services activities and transactions. Most of the countries adopted this system, as well as in India it adopted. The salient features of the system are as under.

4. Uniform SGST and IGST rates to reduce the incentive for tax evasion.
5. Reduction in compliance costs as no requirement of multiple record keeping.

#### Simplified Tax Structure

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none"><li>1. Common procedures for registration, dutyf taxes.</li><li>2. Seamless flow of tax credit from manufacturer/supplier to user/retailer to eliminate cascading of taxes.</li><li>3. More efficient neutralization of taxes to make our exports more competitive internationally.</li><li>4. Benefit of exemption/compounding scheme for a large segment of small scale suppliers to make their products cheaper.</li></ol> | <ol style="list-style-type: none"><li>5. Reduction in multiplicity of taxes</li><li>6. Mitigation of cascading/double taxation</li><li>7. More efficient neutralization of taxes especially for exports.</li><li>8. Development of common national market</li><li>9. Simpler tax regime fewer rates and exemptions.</li></ol> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

1. Reduction in multiplicity of taxes now leviable on goods & services, leading to simplification.

2. Simpler tax regime with some essential exemptions.
3. Harmonization of laws, procedures and rates of tax across the country.
4. Common system of classificzltion of goods & services to ensure certainty in tax administration.

## SHORT COMINGS OR LIMITATIONS OF GST

1. Long term process	7. Higher prices	13. Conflict of interest between Centre and State
2. Difficulty in set off	8. More formalities	14. Post supply discounts and price reductions after supply not eligible for deduction from value
3. Problem in refund	9. Corruption	15. Artificial disallowances of input tax credit
4. Multiple rates of tax	10. Flip side of GST-No 'ease of doing business' in GST	16. Composition Scheme only if all purchases are from registered persons
5. Accounting problem	11. Accounting challenger	17. Valuation provisions copies from excise and service tax law
6. Conflict between States and Central	12. System is master-not human being	18. Interest on delayed payment

## IMPORTANT TERMS AND DEFINITIONS – SEC.-2

### 1. Goods-section 2(52)

"Goods" means every kind of movable property other than money and securities but includes actionable claim, growing crops, grass and things attached to or forming part of the land which are agreed to be severed before supply or under a contract of supply;

- (1) Goods includes all types of movable property like-cloth, sugar, iron, kirana goods vehicles etc.
- (2) Money and securities are not covered under the definition, so these are not goods.
- (3) Growing crops, grass and things attached to or forming part of the land which are agreed to be severed before supply or under a contract of supply will be treated as goods.
- (4) Actionable claim, other than lottery, betting and gambling will not be treated as supply of goods.
- (5) Intangibles like copyright and carbon credit would continue to be covered under 'goods'.

### 2. Services-Section 2(102)

"Services" means anything other than goods, money and securities but includes activities relating to the use of money or its conversion by cash or by any other mode, from one form, currency or denomination to another form, currency or denomination for which consideration is charged;

So, In reference of GST "Service" means-

- (1) Any activity carried out by a person for another for consideration
- (2) But shall not include-

**(A)** (i) A transfer of title in goods or immoveable property, by way of sale, gift or in any other manner, or

(ii) Delivery or supply of any goods which is deemed to be a sale.

(iii) A transition in money or actionable claim.

**(B)** A provision of service by an employee to the employer in the course of or in relation to his employment

**(C)** Fees taken in any Court or tribunal established under any law for the time being in force. So service meant by an activity which is performed by a person to other person for a value or consideration.

### 3. Capital goods – Section 2(19)

“Capital Goods” means goods, the value of which is capitalized in the books of account of the person claiming the input tax credit, and which are used or intended to be used in the course or furtherance of business.

Goods will be regarded as capital goods if the following conditions are satisfied:

- (a) The value of such goods is capitalized in the books of account of the person claiming input tax credit;
- (b) Such goods are used or intended to be used in the course or furtherance of business.

If the value of goods is not capitalized in books of accounts, the person purchasing the capital goods would still be eligible to claim input tax credit on such goods as inputs.

Supply of goods and services or both is basic factor of GST, the word ‘Supply’ is not clearly defined in the Act, however Sec. 7(1) is concerned in respect of ‘Supply’.
